

Swine Biosecurity

Considerations – Eliminate travel of items between facilities when possible. People and items that move between facilities must have proper cleaning performed between locations.

1. **Phones** – clean phones between facilities, change covers, and/or place phones inside bags
2. **Watches** – watches can only travel from multiple swine facilities if bands are changed and the watch is sanitized between facilities
3. **Coats** – jackets and coats should be stored in a clean locker or rack. If potentially contaminated, launder before wearing to another swine facility
4. **Bags & Computers** – dedicated facility bags or disposable bags, wipe down computers with sanitization wipe
5. **Personal Medical Devices** – clean/disinfect and cover as best as possible
6. **Vehicles** – clean/disinfect any potential contaminated floor mats, seats, & cargo areas between facilities
7. **Supplies/Equipment** – minimize movement as much as possible, clean/disinfect
8. **Lockers** - do not cross-contaminate between your street clothes/shoes and facility clothes/shoes

A shower, clothes & shoes change, and overnight withdrawal are required before entry to this facility if you have been near swine from any of the following: **-MSABD, -UW SVM Vet Care, -fairs/shows, -non-UW swine farms/facilities, -petting zoos.** OR if you have **handled samples/tissue from non-UW swine.**

| Livestock Lab to SRTC | | | |
|--|--|--|---|
| What was the Contact level at the Livestock Lab? | | | |
| | SBL 1 contact or entered the facility | SBL 2 Contact | SBL 3 Contact |
| Required actions between facilities: | Disinfect shoes when leaving Livestock Lab | Disinfect shoes when leaving Livestock Lab Shower before arrival to SRTC Mask at SRTC, if same day | Disinfect shoes when leaving Livestock Lab Shower before arrival to SRTC Overnight wait prior to SRTC |

| Swine Biosecurity Level (SBL) | |
|-------------------------------|--|
| SBL - 1 | Minimal Risk, swine from SRTC, only housed at Livestock lab. Standard PPE. |
| SBL - 2 | Moderate Risk, swine from SRTC that have been to CSC isolation. Standard PPE, restricted same day visit to SBL-1 after SBL-2 visit, and cleaning/disinfecting after movement through facility. |
| SBL - 3 | Critical Risk, swine that have been compromised or expressed health concerns. Additional PPE, health screening, and restricted movement. |

International Travel - A shower, clothes change, and four (4) overnights withdrawal are required before entry to this facility if you have been at a swine facility from outside the USA.

Best Practices:

When entering a room with swine (housing or procedure space) dedicated facility shoes and clothes are worn at all times.

Lockers separated between "Street Clothes" and "Facility Clothes." Shared lockers cleaned/disinfected prior to use.

Disinfect shoes when leaving a swine facility OR wear designated street shoes from your vehicle to locker room that does not contaminate your vehicle OR wear shoes covers from the entryway to locker room and removed when exiting the facility at the exterior door.
