

Obtaining Rodents from Outside Institutions and other Non-Approved Vendor Sources

Investigators should first contact their School's assigned RARC Veterinarian and review [RARC Transfers website](#)

To initiate your Import, submit online at <https://ahw.wisc.edu/> select **Create Import Request**

After review by Research Animal Resources & Compliance (RARC) Veterinarian, imports may be approved into **quarantine** and/or **rederivation**

Campus facilities designated as **SPF Level 2 or 3** facilities may require quarantine of imported rodents prior to housing

RARC RODENT QUARANTINE @ BRMS (Biomedical Research Model Services)

- RARC Veterinary staff will submit samples for testing
- Time in quarantine ~ 2-3 weeks
- BRMS husbandry in aseptic Innovive caging and fed irradiated diet

LAB IS RESPONSIBLE FOR ALL HOUSING PER DIEMS AND TESTING FEES
Testing fee = Approx. \$130 to \$175/panel (up to 12 rodents pooled/panel)

Quarantine location, policies and costs are college/facility dependent, if housing outside SMPH please contact your facility veterinarian for details.

If free of excluded pathogens, with Veterinary approval, rodents will be released to designated SPF Level 2 or 3 Facility

EXCLUDED PATHOGENS, if detected:

- Any costs related to required treatment, testing/re-testing and/or associated with rederivation are incurred by Primary Investigator (PI)
- Euthanasia may be required
- Depending on pathogen detected, final housing location may be changed to accommodate pathogen status (SPF Level 2 vs SPF Level 3)

All campus **SPF Level 1** facilities, including the **BRMS SPF Mouse Breeding Core**, require rederivation of imported rodents prior to housing

Contact GEAM for rederivation consult at animalmodels@biotech.wisc.edu **PRIOR** to submitting your import request

GEAM-REDERIVATION CORE

Lab is responsible for cost of rederivation.

Quarantine testing of imported rodents may be required prior to obtaining rederivation services.
